**JAMES CARTER,
SEEDSMAN AND FLORIST,**

238, HIGH HOLBORN, LONDON.

* * *A very extensive Catalogue of Floricultural, Culinary and Agricultural
Seeds will be published at the usual time.*

August 1851.

[Entered at Stationers' Hall.]

Gift of
Earl Blough
November 1957

EXPLANATIONS.

* indicates such Bulbs as are proper for pots, but not for glosses. ** indicate such Bulbs as are most proper for forcing either in pots, glosses or moss; all with * or ** are proper for the open borders also. See page 3.

The *Amaryllidaceæ* (page 15) are chiefly greenhouse or stove plants; the hardy kinds are designated. The *Iridaceæ* are proper for the greenhouse or frame, but they succeed very well in the open borders.

September, October and November are the best months for general planting. *Iris* and *Fritillaries* do not keep well out of the ground, and should be planted as soon as received, any time during the months of September and October; but they, as well as other hardy bulbs, may be planted much later.

Ladies and Gentlemen are respectfully informed, that if the choice of the *Hyacinths*, &c. is left to J. Carter, he will guarantee their giving entire satisfaction; but he begs to observe that *Hyacinths* flower much better in pots than water.

NAMED HYACINTHS

IN ASSORTMENTS.

In giving orders please to mention the letter.

I. Proper for pots or borders*.

W	3 of do. do. do.		0 4 6

J. Carter requests to be informed whether the *Hyacinths* are intended for water, pots, baskets, or the open borders; also whether double or single *Hyacinths* are preferred, or part of each. If the selection is left to him, he generally sends two-thirds double and one-third single, which will be found to give greater variety. *Hyacinths* may be arranged with much more effect when there are duplicates of the same kind.

DOUBLE HYACINTHS.

** for water, moss, or borders.

* for pots or borders.
